CONNECTION OF LEADER TO LINE AND DEVICE THEREFOR

SATO FUJIO

Inventor(s): ;SATO FUJIO

Application No. 03143761 , Filed 19910520 , Published 19921202

Abstract:

PURPOSE: To provide a method for connection, free from fatigue of a leader at a knot between a line and a leader in fishing and to provide a device therefor.

CONSTITUTION: As the method for connection of a leader to a line in this invention, a knot 3 between the line 1 and the leader 2 is buried into an elastomer 4 and fixed thereto and the leader 2 is moved upward along the line 1 and elastically suspended from the upper part of the elastomer 4 with a prescribed curvature radius (R) from the knot 3. The device for connection is designed so that a knot 3-positioning device (space 6) may be attached to the desired- shape (drum shape or rod shape) elastomer having a guide hole 5 for the line 1 at a position of $2/3.L$ from the upper end part of the whole length L of the above-mentioned elastomer.
